Inspector Observations:

On 1/23/19 R. Wood conducted a complaint investigation only since a routine inspection was done in the last quarter. Cora Camuy, shift leader, was available for comments. She was unaware of the issue or the complaint. Cory said just recently they have noticed a few little roaches by the wrapping paper boxes that has been brought up to the managers attention. Upon investigating, observed roach infestation in between the openings joints of the front 2 reach in cooler display cases, and under wrapping paper boxes stored underneath said reach in coolers. Observed various sizes of roaches coming out of the small openings by the wall under the warmer table. No other area at facility was observed with signs of roach at this time.

Facility is voluntarily closed and has to remain closed until issue is eradicated through approved pest control measures. In addition, all openings, and gaps as pointed out need to be properly sealed and closed to prevent further pest harborage. Facility needs to stay closed and cannot be reopened prior to properly treating the infestation issue, clean and sanitizing facility as required after treatments=, and being reinspected by a member of this department on or before 1/25/19. For any questions, concerns contact. K Vejar at 951-273-9140.
